2. An additional remark to the ship repair plan read "During the repair periods in the shipyard, the vessels will not be decommissioned but will maintain their fighting power".
3. Since the vessels of the Maritime Hydrographic Service, which completed a repair period as late as late summer or fall, are not listed in the plan, it is believed that the other remaining sea police vessels are also not completely named in the list.

1. Comment. This is the first report of the fact that several vessels were scheduled to undergo periodical repairs at the Peenemuende fleet base, probably with military personnel of the Sea Police. It is believed that this measure was taken because of the well-known shortage of skilled workers and the overburdening of the shipyards. The Sea Police detailed all engine-room personnel which became available due to the delay in the commissioning of certain vessels (HABICHT- SCHWALBE-types) to help with the repair work on some vessels at the Peenemuende fleet base.
